

Atlas is pleased to announce new micro-payment options to improve your e-shopping experience

WE MAKE
YOUR LIFESTYLE
EASIER, SIMPLER AND SAFER!

Online cards Payment Solution

The online payment is a well-established and secure method; Launched in the Gulf area/Egypt and Iran, and having successfully served the Middle East and Iran regions on major online products, it has now spread its wings globally and Atlas is proud to offer this payment solution under its portfolio.

The Online payment card plays a key role in the development of the Internet for Arab community across the region. It allows purchasing dozens of products and services, if the user does not like carrying a lot of cards in his wallet and want to find all the services and cards in one place, the online payment solution is definitely the right choice.

WHO DOES IS WORK:

OneCard and Shetab are the first electronic payment cards through the internet in the gulf/ North Africa and Iran areas. You can start using the card rapidly and easily by following the next steps:

Simply register with a local distributor, top up the account with the desired amount or purchase a prepaid card. The account/prepaid card can then be used to purchase any product on the internet.

Micropayment Solution: International domestic Number: ONE NUMBER ACROSS THE GLOBE

Micropayment services are accessible everywhere which enable user's phone to dial the designated number in order to sell and purchase any products on the internet. Users no longer need to use their credit cards, prepaid cards or any other online payment solution and Atlas no longer requires complicated billing systems. Payments are made using the phone line.

Content providers no longer need to bill their users through domestic numbers accessible on each operator, reduce the hassle of revenues collection, shorten the payment cycle and use one number which is virtually open from all operators in the world. Depending on the amounts of minutes users spent on the phone, their account will be recharged with the adequate virtual currency.

WHO DOES IS WORK: +88XXXXXX

Once users are interested in retrieving certain content or purchasing some products, all they have to do is pick up the phone, dial the designated number and follow the required steps in order to accomplish their transaction. Users will get charged on their phone bill - it's that simple!

REVENUE COLLECTION:

Atlas will transfer your collected revenues, together with a detailed traffic report. In addition, Web masters implementing Atlas services may view and monitor users traffic and generated revenue status, using the Atlas statistics. Revenues are paid to the client in 55 days EOM.

We will still offer the various ranges of payment solutions that we have served so far and will continue to source for additional payment methods to ensure our customers a safe and smooth shopping experience with us.
